Camp FAQ'S*

Q: Where do I drop off/pick up my child?

A: All Activities Campers should be dropped off at the round-about near the main entrance to the club not before **8:50AM**. Pick up for campers should be completed by **3:10PM**.

Q: What if my child arrives late to camp, is being dismissed early or is going to be absent from camp?

A: Attendance is taken daily and we ask parents to notify the front desk at **Kingsbury Club at 508-359-7800** if their child will be absent from camp without prior notice. Late arrivals need to be accompanied by their parent to their scheduled activities.

For early dismissals, parents and/or authorized adults on the signed authorization form will be able to pick up the camper at their scheduled activity and notify the appropriate camp Director/Counselor.

In the event of an emergency, if a person not previously authorized is to pick up a child, the parent must notify the appropriate Director by phone or written note and the adult being authorized must provide photo identification.

Q: Who do I contact with questions/problems or any changes for my child in regard to camp?

A: Activities & Extended Day Camp Director - Lori Costa at 508-359-7800

Q: What should my child bring to camp?

A: Campers need to dress appropriately for the weather conditions and have sunscreen applied. We suggest that parents label all belongings with the camper's name. In addition, campers need to bring **lunch (or purchase a children's meal through Ice House) and a mid-morning snack, water bottles, additional sunscreen, bug spray, a towel, bathing suit, extra socks/shirt, hat or visor; and appropriate close toed footwear-preferably sneakers**. Water coolers will be available throughout the day for campers to re-fill their water bottles. A mid-afternoon ice cream snack will be provided for campers.

*Indicates sections that you keep for your records ^Indicates sections that must be turned in

Camp participants should wear their bathing suits in the morning and bring a full change of clothes including underwear and a sweatshirt.

Please note that the Kingsbury Club is not responsible for any lost or stolen items. Campers are asked **NOT** to bring personal items from home such as ipods, electronic games etc. Please note campers with cell phones will be asked to keep them turned off and kept with their personal belongings.

Q: What is the make-up policy if my child misses a day of camp?

A: There are no make-ups or credits for missed days. Please notify us in advance (if possible) if your child will miss a day due to illness.

Q: What if it is raining prior to the start of camp?

A: All campers should report to the Kingsbury Club at the regularly scheduled time.

Q: What if it rains during the day?

A: The camp staff has organized a wide variety of indoor activities/fitness/games/arts and crafts to keep your child fully engaged. We have use of a fitness room and basketball/tennis/pickleball court in the event of rain.

Q: What will my child's day be like?

A: **Activities Camp** morning schedule includes 1 ½ free swim, lawn activities and active games. Following lunch, campers will participate in a variety of field games, slip and slide, water games and arts and crafts.

Extended Day Campers –will be integrated into the Activities camp for all afternoon activities.

Q: Who will be overseeing the camp?

A: **Activities Camp and Extended Day Camp** will be overseen by Director **Lori Costa**, along with a staff of Kingsbury trained counselors.

Please do not hesitate to call with any questions/concerns as our goal is to make your child's camp experience the best one ever!

Parent Authorizations^

1. I give permission to the camp health supervisor to share information relevant to my child's health condition with appropriate camp personnel when needed to meet my child's health and safety needs.
2. I give the camp health supervisor permission to exchange information with my child's Primary Care Physician for the purpose of referral, diagnosis, and treatment.
3. I give the camp health supervisor permission to administer Tylenol, Advil, Motrin, ibuprofen, cough drops, and/or over-the-counter medications as deemed necessary. Manufacturer's dosage guidelines shall be used.
4. I give the camp health supervisor permission to delegate medication administration to non-licensed personnel after proper instruction on the dose, route, frequency and reason for administration of the medications(s) when deemed safe and appropriate. Staff is instructed to activate EMS in emergency situations.
5. In the event reasonable attempts to contact me by phone have been unsuccessful, I hereby give my consent for the administration of any treatment deemed necessary by a licensed physician or dentist and for the transfer of my child to any hospital reasonably accessible.
6. I agree to the release of any records necessary for insurance purposes.
7. The camper herein described has permission to go on off campus trips (if applicable).
8. I give permission for the contact, insurance, and parent/guardian sections of any forms to be photocopied for off campus trips (if applicable).
9. Risk Warning Statement-
 The Kingsbury Camp asks campers to participate in a variety of activities throughout the season. Many of these activities carry some risk of injury.
 The camp makes every effort to provide:
 -Safe transportation
 -Safe equipment and facilities
 -Competent instruction and supervision
 It is important that the camp has a record of your acknowledgement of these risks, and we ask you to sign and return this form. It is a statement agreeing that you understand that there are risks involved for campers involved in camp-sponsored activities.
10. I understand that my child will not be allowed to attend Kingsbury Camp until I have provided health records fully in compliance with state and local regulations. I understand and agree that it is the responsibility of the parent/guardian to provide the completed health information.

**CAMP KIDSBURY Summer Camp
Sunscreen/Insect Repellent
Application Authorization**

Sunscreen/Insect Repellent Policy: Parents are responsible for applying sunscreen to their child(ren) prior to arrival at camp. Children should bring additional sunscreen to apply throughout the day. When necessary, staff will assist with the application of sunscreen/insect repellent spray. Should parents request that sunscreen lotion/insect repellent be applied, parents will be required to complete this Sunscreen Lotion/Insect Repellent Authorization Form granting staff permission to assist with application and tape or rubber band the form to the bottle. All sunscreen/insect repellent bottles will remain in our staff's care and will be easily accessible. Additionally, parents may also encourage their child to wear a hat, wear sunglasses, and wear UV protective clothing when playing outdoors. Please teach your child(ren) how to apply sunscreen correctly and talk with your child(ren) about the importance of applying sunscreen.

Camper's Name _____

As a parent or guardian of the above child(ren), I give permission for the staff at Camp KIDSbury to apply sunscreen/insect repellent product on my child, as specified below, when he/she will be engaging in outdoor activities. I understand that sunscreen may be applied to exposed skin, including but not limited to the face, tops of ears, nose, bare shoulders, arms and legs.

Additionally, I have checked and/or indicated below my directives regarding the type and application of sunscreen/insect repellent:

___ Staff may use the sunscreen that I am providing with this form
Brand _____ SPF _____

___ In the event that my provided sunscreen is not available, I give permission to use any available sunscreen

___ Please do not apply sunscreen to the following areas of my child(ren) body:

Parent/Guardian

Meningococcal Disease and Camp Attendees: Commonly Asked Questions

What is meningococcal disease?

Meningococcal disease is caused by infection with bacteria called *Neisseria meningitidis*. These bacteria can infect the tissue (the "meninges") that surrounds the brain and spinal cord and cause meningitis, or they may infect the blood or other organs of the body. Symptoms of meningococcal disease can include fever, severe and constant headache, stiff neck or neck pain, nausea and vomiting, and rash. In the US, about 350-550 people get meningococcal disease each year and 10-15% die despite receiving antibiotic treatment. Of those who survive, about 10-20% may lose limbs, become hard of hearing or deaf, have problems with their nervous system, including long term neurologic problems, or have seizures or strokes.

How is meningococcal disease spread?

These bacteria are passed from person-to-person through saliva (spit). You must be in close contact with an infected person's saliva in order for the bacteria to spread. Close contact includes activities such as kissing, sharing water bottles, sharing eating/drinking utensils or sharing cigarettes with someone who is infected; or being within 3-6 feet of someone who is infected and is coughing and sneezing.

Who is most at risk for getting meningococcal disease?

People who travel to certain parts of the world where the disease is very common, microbiologists, people with HIV infection and those exposed to meningococcal disease during an outbreak are at risk for meningococcal disease. Children and adults with damaged or removed spleens or persistent complement component deficiency (an inherited immune disorder) are at risk. Adolescents, and people who live in certain settings such as college freshmen living in dormitories and military recruits are at greater risk of disease from some of the serotypes.

Are camp attendees at increased risk for meningococcal disease?

Children attending day or residential camps are not considered to be at an increased risk for meningococcal disease because of their participation.

Is there a vaccine against meningococcal disease?

Yes, there are 2 different meningococcal vaccines. Quadrivalent meningococcal conjugate vaccine (Menactra and Menveo) protects against 4 serotypes (A, C, W and Y) of meningococcal disease. Meningococcal serogroup B vaccine (Bexsero and Trumenba) protects against serogroup B meningococcal disease, for age 10 and older.

Should my child or adolescent receive meningococcal vaccine?

That depends. Meningococcal conjugate vaccine (Menactra and Menveo) is routinely recommended at age 11-12 years with a booster at age 16. In addition, this vaccine may be recommended for children with certain high-risk health conditions, such as those described above. Otherwise, meningococcal vaccine is not recommended for attendance at camps. Meningococcal serogroup B vaccine (Bexsero and Trumenba) is recommended for people with certain relatively rare high-risk health conditions (examples: persons with a damaged spleen or whose spleen has been removed, those with persistent complement component deficiency (an inherited disorder), and people who may have been exposed during an outbreak). Adolescents

*Indicates sections that you keep for your records ^Indicates sections that must be turned in

and young adults (16 through 23 years of age) who do not have high risk conditions may be vaccinated with a serogroup B meningococcal vaccine, preferably at 16 through 18 years of age, to provide short term protection for most strains of serogroup B meningococcal disease. Parents of adolescents and children who are at higher risk of infection, because of certain medical conditions or other circumstances, should discuss vaccination with their child's healthcare provider.

How can I protect my child or adolescent from getting meningococcal disease?

The best protection against meningococcal disease and many other infectious diseases is thorough and frequent handwashing, respiratory hygiene and cough etiquette. Individuals should: wash their hands often, especially after using the toilet and before eating or preparing food (hands should be washed with soap and water or an alcohol-based hand gel or rub may be used if hands are not visibly dirty); cover their nose and mouth with a tissue when coughing or sneezing and discard the tissue in a trash can; or if they don't have a tissue, cough or sneeze into their upper sleeve. not share food, drinks or eating utensils with other people, especially if they are ill. 4, contact their healthcare provider immediately if they have symptoms of meningitis. If your child is exposed to someone with meningococcal disease, antibiotics may be recommended to keep your child from getting sick.

You can obtain more information about meningococcal disease or vaccination from your healthcare provider, your local Board of Health (listed in the phone book under government), or the Massachusetts Department of Public Health Division of Epidemiology and Immunization at (617) 983-6800 or on the MDPH website at www.mass.gov/dph. Provided by the Massachusetts Department of Public Health in accordance with M.G.L. c.111, s.219 and 105 CMR 430.157(C). Massachusetts Department of Public Health, Division of Epidemiology and Immunization, 305 South Street, Jamaica Plain, MA 02130 Updated March 2018
